

## PageAlert Wireless for Factories

Small wireless device  
WLS-V214 with (4)  
independent buttons

*Machine operators can press a button to call Supervisors, Inspectors, Mechanics, and Emergency Response Teams. Messages delivered in seconds.*

Whatever your manufacturing process is, operators cannot leave their work location unattended. Operators must constantly keep watch even if the process is under sophisticated automated computer control. This generally applies to packaging medicine, printing, mold injection, food processing, manufacturing auto parts, chemical production and to multiple industrial processes.

When an operator needs help, every second is critical to maintain productivity. In case of an accident, [Emergency Response Teams](#) must be notified immediately.

PageAlert delivers text messages **within seconds** to pocket pagers carried by factory staff.
