Navair Technologies and Canamex Communications Corporation team up to offer reciprocal products and services for delivering emergency text messages and DAS (Distributed Antenna Systems)

Mississauga, ON – **Navair Technologies** and **Canamex Communications Corporation**, Markham, Ontario, announce a teaming agreement to offer turnkey solutions for delivering alarm and emergency “text” messages IN SECONDS to staff with onsite pagers in Hospitals, Mines, Subways, Dams, and in any underground installation.

The Canamex’s PageRouter Message Management System can connect to a multitude of message sources such as SCADA and PLC systems, Monitor Control, Building and Medical Alarm systems, to automatically send alarm text messages to people with onsite pagers or any type of wireless devices. By using a browser, staff can type or use programmable text messages, to page from unlimited network computers.

As a result of this agreement, customers will save money and time by purchasing from one source a complete, end-to-end turnkey system consisting of the PageRouter Message Management System integrated into a single Distributed Antenna System, for signal coverage including RF hard-to-reach areas. In addition, RF signals will also be distributed to underground and in-building two-way radios and cellular phones to ensure communications as a part of a turnkey package. ***“This means alarm and emergency messages to onsite pagers are delivered within a few seconds.”***

About Canamex Communications Corp

Canamex Communications Corporation is a leading manufacturer and supplier of wireless message management products to the North American marketplace. Founded in 1978, Canamex Communications has a long history of developing innovative messaging products for Hospitals and the health-care industry. Leveraging their software and hardware design capabilities, Canamex has produced products that are used in an estimated 40% of all hospitals in the USA. Their products have also found applications in many and varied facilities requiring flexible messaging capabilities, such as Emergency Dispatch Agencies, Fire Departments, Government Services, and Factories. With the success of its flagship product, the PageRouter system, Canamex Communications has realized a truly flexible, protocol-agnostic platform that can deliver messages from virtually any device to any other device, wired or wireless, regardless of type. More information on Canamex Communications Corporation and their products can be obtained from their website at www.canamexcom.com.

About Navair Technologies

Navair Technologies is a leading distributor of specialized Communications Test and Measurement products to Canadian Government and Industry. Its Product Distribution Group represents the leading Test and Measurement OEM's in the world. Navair's calibration lab capabilities include frequencies from DC to 50 GHz, supporting a very diverse range of OEM Test and Measurement products.

Its Systems Solutions Group is the premier professional service organization providing turn-key in-building wireless solutions for all types of building facilities on a global basis. Their broadband and narrowband solutions combine Public Safety Radio Systems (for First Responders including Fire, Police, EMS), Commercial Wireless Services (Cellular, PCS, Mobile Data), Wireless Internet technologies (Wi-Fi, WiMAX), and emerging technologies such as Tracking / RFID.

As a true System Integrator, Navair offers a vendor-neutral design approach using best-in-class products ideally suited to every unique application. Their solutions include both coaxial and fiber-optic based architectures and an ever-evolving class of products addressing the growing demand for high-performance, high-bandwidth in-building wireless networks including voice, data and multi-service networking applications. More information about Navair Technologies is available from its Web site at www.navair.com.
