

# PageRouter Pro

The Next Generation of Message Management Technology

## PageAlert Wireless for Clinics

Small wireless device  
WLS-V214 with (4)  
independent buttons

**Doctors can press a button to call assistants, X-Ray technicians, notify when ready to receive a new patient or to ask for help in case of an emergency. Messages are delivered in seconds.**

The PageAlert Wireless system will **increase customer service levels** and **reduce stress** in busy environments.

PageAlert is a **very user-friendly** system. Install a small wireless device such as the WLS-V214 with (4) buttons in each office and examination room. Program a canned message to each button of every wireless device. Assign each button to page a person, a group of people or to all the individuals carrying a pocket pager.

Choose from a **QUIKPAGER** keyboard entry device or **PageRouter** software to send messages from unlimited network computers. The PageAlert system is self-contained, extremely reliable and easy to program.
