

# PageRouter Pro

The Next Generation of Message Management Technology

## PageRouter Wi-Fi Mobile

Use PageRouter Mobile to send data to **wireless smart devices** such as PDAs, laptops, tablets and other popular Wi-Fi mobile products. You can send text message with possibly one or multiple file attachments. **Text messages are delivered in SECONDS!**

### MESSAGE READ CONFIRMATION

Deliver critical messages to staff automatically obtaining confirmation of not only delivering the message to the device, but if the recipient has **"READ"** the message! **There are no more doubts if someone received and read critical messages!**

### TEXT MESSAGES WITH FILE ATTACHMENTS

Deliver electronic files of any format attached to a text message. Imagine a Supervisor sending to staff specific instructions and a picture of a part, or of a customer, an X-ray, a drawing, or any graphics or audio files. PageRouter can also tell the sender if the recipient has **"VIEWED"** the attached files!

### MESSAGES FROM ANY COMPUTER

Staff at one or multiple building locations, no matter how far apart, can use any computer in the network, *with no need for special software*, to send text messages and files to Wi-Fi mobile users. Simply open a browser to login to your PageRouter using the built-in **WebPager Message Management** application.

### Wi-Fi TO Wi-Fi DEVICE MESSAGING

Each Wi-Fi mobile user can send text messages to other Wi-Fi users, automatically obtaining message **"READ"** confirmation. Messages can have one or more attachments. *i.e.: John uses his Wi-Fi device to send a message with a picture and a document to Mary's Wi-Fi device.*

### INFORMATION SECURITY

For your security and peace of mind, each text message and all attached files are encrypted using Industry standard **security algorithms**. Messages and attachments travel safely through your Intranet or the Internet, with no worries of hackers or someone viewing private information.

### MESSAGES TO Wi-Fi AND OTHER DESTINATIONS

Select optional destinations such as **ONSITE** pagers, commercial pagers, email and messages to other PageRouters.

**Sending text messages to Wi-Fi mobile devices and to Canamex ONSITE pagers is a very powerful combination.**

Any brand of Wi-Fi  
Smart Devices, laptops,  
tablets with  
Microsoft Windows Mobile  
V5.0, V6.0 or V6.1  
Windows CE,  
Pocket PC 2003

Users log into WebPager to  
send messages

ONSITE pagers receive text  
messages in seconds too!

**CANAMEX COMMUNICATIONS CORPORATION**

## MESSAGE MANAGEMENT

Send messages from unlimited network computers, Nurse Call systems, Medical and Industrial Monitors, PLCs, SCADA, touch-tone telephones and from remote PageRouters. Users log into the built-in **WebPager Message Management** application to:

- Send messages to individuals, Groups and Departments.
- Organize and **page users by Departments**.
- Create and change unlimited **Groups** with drag-and-drop action on a page map. **React quickly to emergencies.**
- Use **scheduled messages** to be sent at a future date and time.
- Program unlimited **text canned messages** for individuals or Departments for fast message entry.
- Quickly **attach one or more files** to a message.
- View logs of "sent" and "received" messages and open corresponding attachments.
- **Forward** received messages with attachments.

## IN-HOUSE INSTANT MESSAGING

- PageRouter Mobile offers **in-house "CHAT" Instant Messaging**.
- All "**CHAT**" messages are securely encrypted.
- Users can establish independent sessions from computers to Wi-Fi or from Wi-Fi to other Wi-Fi devices.

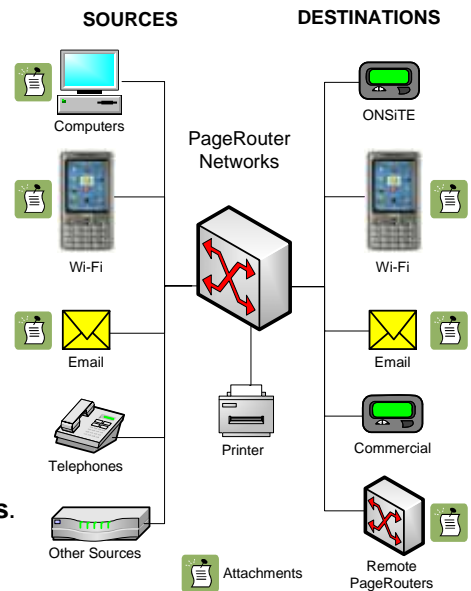

## LOGS

PageRouter maintains a **Master Log** that provides reports of messages which can be exported in Excel, Adobe and other popular formats. The Log shows each message:

- Sent from computers using WebPager to users with Wi-Fi wireless devices.
- From Wi-Fi wireless devices to other Wi-Fi wireless devices.
- Sent to other destinations such as **ONSITE** pagers, email, commercial pagers and to other remote PageRouter locations.

## SUMMARY OF INTEGRATED MESSAGING FEATURES

- Send **messages and file attachments** from computers to Wi-Fi devices.
- Attached **files can be of any format**.
- Wi-Fi users can send messages to **Pagers, other Wi-Fi devices and email**.
- Wi-Fi users receive notification **when Wi-Fi recipients READ the messages**.
- **Emails with attachments** to users with ONSITE pagers and Wi-Fi devices.
- ONSITE pager users can **VIEW attachments in their WebPager Log**.
- Wi-Fi and WebPager users can send **email with attachments**.
- Wi-Fi and WebPager users can establish **in-house "CHAT" sessions**.
- Messages and attachments are **encrypted with Industry security protocols**.
- Staff using WebPager can **forward messages** and attachments to other users.

**TIP:** Contact your IT Department or your wireless service provider for information about Wi-Fi citywide roaming options.
