unlimited network computers

In addition to standard PageAlert functions, you can benefit from additional functionality:

- **PageRouter Pro** allows you to quickly change **PageAlert** canned messages and message destination assignment with drag-and-drop action.
- Program **escalation** to send the alarm message to an alternate individual or Group, if contact does not change status within a programmable period.
- Program specific **monitoring date and time** per contact. *i.e.: Monitor back exit door between 5 PM and 3 AM.*
- Program "**Time Shifts**" to be assigned to users and Groups. Change users in Groups, at anytime, following work schedules. *i.e.: Contact 3 should page staff in the Night Shift group between 6 PM and 2 AM and in the Day Shift group between 8 AM and 4 PM.*
- Provide access to authorized personnel to **send messages from any network computer** using a browser.
- Authorized personnel can **view the log of alarm and regular messages** for their Department on any network computer.
- Use "maps" with "**drag-and-drop**" action to program users in Groups and Departments, program Time Shift assignment, and contacts assignments including escalation.

PageRouter gives the Administrator **complete programming flexibility** to change canned alarm messages, destination of messages, time shifts, people in Groups, and all monitoring parameters on the PageRouter computer.

PageRouter Pro

The Next Generation of Corporate Messaging Technology

Installation example of PageRouter Pro with PageAlert Modules

Booster

DPW-5W

PageAlert PA-16

PageRouter or TeraMessage Link

ALPHA4 GOLD Industrial pocket pagers

1. Run a twisted pair cable from each PageAlert contact monitor to each relay contact.

2. Connect the PA-16 module to a serial port of the PageRouter Pro computer using a 6 ft. RS-232 cable. You can extend the cable length by using RJ-45 to 9-pin D adaptors and up to 1,000 ft. of CAT5/CAT6 cable with RJ-45 connectors.

3. In PageRouter, for each contact, program a canned message, the recipient and select transmission on contact close, open, or both. Optionally, program repeats, escalation and response delays. Program users, Groups, Departments and Time Shifts.

4. Connect the DigiPager paging transmitter to a serial port of the PageRouter computer using a 6 ft cable. You can extend the cable length by using RJ-45 to 9-pin D adaptors and up to 1,000 ft. of CAT5/CAT6 cable with RJ-45 connectors.

5. Install the wall mount antenna. Connect the antenna to the DigiPager transmitter.

6. Alarm and typed messages are received in one or all the pagers, within a few seconds.

PageRouter Pro offers multiple options that can be added at any time. For example, it can send alarm messages to Blackberrys and other Smartphones; receive plain ASCII messages from existing Alarm systems; and many other optional capabilities. Please contact us for specific applications.
