PageRouter WebPager

The Next Generation of Message Management Technology

ALPHA 4 GOLD pagers

PageRouter Lite, Pro and Enterprise are delivered with WebPager to send messages from UNLIMITED computers using a browser. There is no need to install special "client software", pay for "seats" or for the number of network computers.

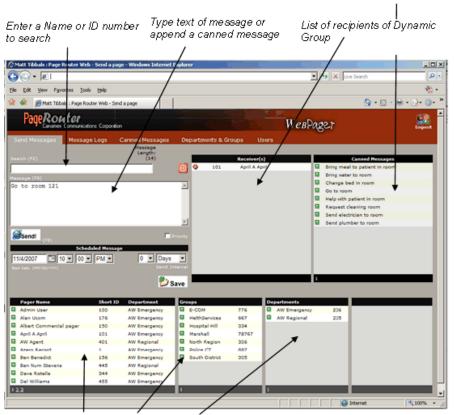

Do you want to send messages to your staff from wherever you are via the Internet? We can tell you how to setup PageRouter to send messages from the Internet with 100% access security.

MESSAGE MANAGEMENT

With PageRouter, users log into the built-in **WebPager Message Management** application to:

- Send messages to individuals, Groups and Departments.
- Create and change unlimited Groups with drag-and-drop action on a web page map. React quickly to emergencies.
- Schedule messages to be sent at a future date and time.
- Program unlimited canned text messages for individuals or Departments for fast message entry.
- View logs of "sent" and "received" messages.
- Forward received messages.

OPTIONS

User can view Names, Groups and Departments according to permission on the User profile

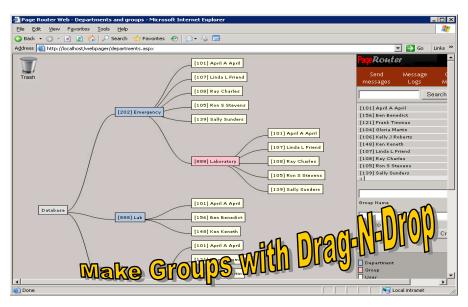

PageRouter offers options to send messages from Nurse Call systems, Medical and Industrial Monitors, PLCs, SCADA, touch-tone telephones, from third-party applications and from remote PageRouters. Other options allow you to send messages to cellular phones using TeraMessage, to commercial pagers and to your remote locations to page people onsite. With the **PageAlert** option, PageRouter can monitor over 1,000 contacts or respond to alerts from wireless buttons. Choose PageRouter with a suitable **User Database Capacity** to program staff with or without a wireless device

MANAGING DEPARTMENTS AND GROUPS

Organize staff by Departments shown in blue boxes. For each Department, create unlimited Groups shown in pink boxes, with unlimited number of people from the same or other Departments. With the 4-LVU option, you can page Departments and Groups from touch-tone telephones by using a short ID. The same programming screen is available on any network computer using WebPager with the PageRouter Remote Programming option.

LOGS OF MESSAGES

PageRouter provides a Log with the detail of each message such as date and time of transmission, who sent the message from computers using WebPager, the name of the recipient and the text of the message. You can filter the log information by date and time and export it in excel or PDF document format.

PageRouter System consisting of a computer, a DigiPager Wireless transmitter and an antenna
