

QUIKPAGER™ 2400

SEND ALPHANUMERIC MESSAGES DIRECTLY FROM YOUR OFFICE USING THE TELEPHONE LINE, WITH **FAST, EASY, USER-FRIENDLY** QUIKPAGER. STATE-OF-THE-ART TECHNOLOGY FOR INSTANT DELIVERY OF INFORMATION AND MESSAGE MANAGEMENT.

Two Year Parts and Labor Warranty

Sending a Message from the 200 Name Directory

Type Name of the recipient then type the Message!
Or schedule messages for future transmission.

32 Group Directory with Dynamic Group Transmission Management

Create 32 Groups with any number of people. QUIKPAGER will continue with pending messages if paging terminal hangs up or is disconnected in the middle of a Group transmission.

Avoid annoying message duplications.

Canned Messages

Program frequently used phrases for faster entry of messages. I.e.: "Call the office", "Returned your call", etc.. A label is shown on the top right corner for quick reference.

Select by pressing a function key.

Internal memory for viewing up to 300 daily sent messages

Scroll through previously sent messages to confirm transmission, read back to caller or simply re-send a message at any time.

Offers maximum paging performance.

Print each person's list of messages in chronological order

A fabulous feature to produce records of messages for each person carrying a pager!

100% guaranteed message delivery with Error Notification

If message is not accepted by paging terminal, the reason is displayed for notification. I.e.: "Jim Brown - Invalid ID".
Eliminate transmission doubts.

Unique Internal Surge Protector

Automatic shut-off feature protects programming and components during electrical storms and lightning.
A valued feature in severe weather.

"Cloning" and Programming back-up

Using the RS-232 port, programming is easily transferred to other QUIKPAGERS. Also make back-ups to a PC.
Reduces programming time for additional QUIKPAGERS.

Transfer Programming over the Telephone Line.

Programming is transferred in a couple of minutes from one QUIKPAGER to another over the telephone line,
saving valuable service time.

Extreme High Reliability

At the factory, QUIKPAGERS spend 72 hours operating in a heat room at 104F degree cycles. This quality control
provides operation security and reliability.
