TeraChat

TeraChat is delivered with TeraMessage at no additional cost. With this powerful feature, you can establish **instant chats** between computers, or between computer and mobile smart devices.

TeraChat is ideal for staff who spend most of their time sitting at their desk, and are therefore quickly and easily reached at their computer.

Chat with other TeraChat Users, or engage in 2-way instant chat with TeraMessage App Users.

All messages are protected, automatically, by **AES 256 bit random encryption**.

With many convenient features to maximize your user experience, TeraChat is sure to please.

- ▶ Accessible through the WebPager interface; There is no additional software required.
- ▶ View online status of other TeraChat and TeraMessage App Users.
- ▶ Automatic read confirmation.
- ▶ Optional audio to announce incoming messages.
- ▶ PageRouter Enterprise Server logs the full details of all TeraChat message traffic.
- ▶ Get optional **TeraFile** to enable sending attachments.
