# TeraMessage App

Turn existing smartphones or tablets into secure, private text messaging devices for confidential communications in your Corporation.

Using TeraMessage App, personnel can send and receive messages using their smartphones and tablets. Messages and attachments are automatically protected by **point-to-point random encryption**.

TeraMessage App can be used with popular wireless devices running **Android and Apple** operating systems.

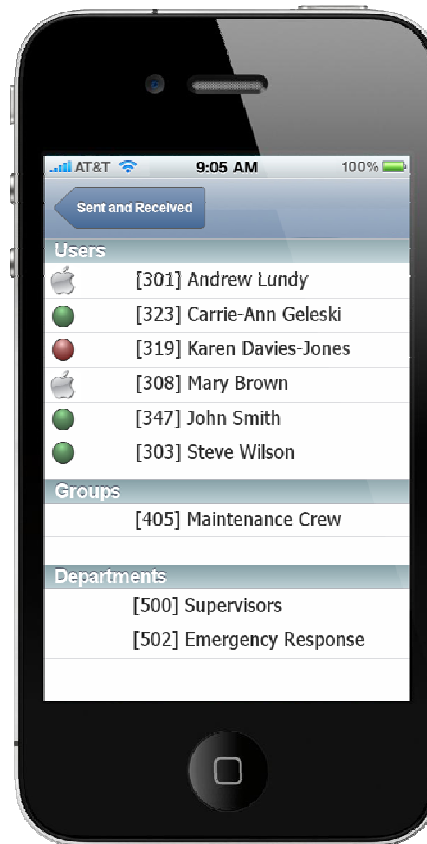

## Standard App Operations

- ✓ Use cellular or Wi-Fi networks.
- ✓ No interference with SMS or email.
- ✓ Messages received while in sleep mode or while using other apps.
- ✓ Automatic User online status update.

## Easy to Use

- ✓ Standard folder navigation and conversation screen.
- ✓ Keep organized with delete, lock, and purge functions.
- ✓ User, Group and Department Lists update automatically from PageRouter Enterprise Server.
- ✓ View sent, received and read status of sent messages.

## Privacy and Security

- ✓ Keep cellular phone numbers private; just install the app, and login with your username and password!
- ✓ Military level encryption.
- ✓ The Administrator can disable operation and delete all stored messages, remotely from PageRouter, Server, on all lost or stolen devices.

## Message Receipt Assurance

- ✓ Messages received within seconds.
- ✓ Automatic read confirmation!
- ✓ Logs show full message details of all TeraMessage App traffic.

## ... and More!

- ✓ Select specific alert tune to differentiate TeraMessage reception.
- ✓ Instant chat with TeraChat users.
- ✓ Send attachments with TeraFile option.

With so many **convenient features**, the TeraMessage App is sure to exceed your Corporate requirements.
