

miniPAGER™ with Call Alert™

- Automatic paging of Caller ID
- Page personal private messages

The practical paging tool for home and small business

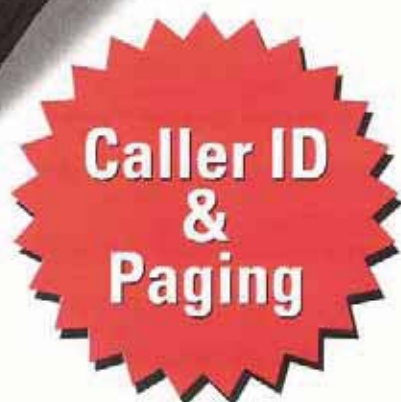

- Page private messages directly from home to spouse and kids
- Send business messages
- Caller ID* paging while you are out
- Voice Mail Call Waiting notification*
- Emergency notification**

miniPAGER is a powerful tool if you carry an alphanumeric pager

When used at home, any member of your family can easily page you personal and private messages. If used for a small business, miniPAGER is great for managing calls and business messages.

As a Caller ID*, miniPAGER displays the name and phone number of a caller before you answer.

Keep track of calls, even when you are not there to answer. When leaving home or the office, set miniPAGER to page Caller ID information advising if someone answered, even if it was your fax or answering machine. If you subscribe to Call Answer*, miniPAGER will page notification if a Voice Mail message was left by the caller.

miniPAGER gives you a vital connection with your family or business

Messages can easily be paged at any time. If you are receiving a fax or someone else is using the line, miniPAGER automatically waits until the line is free, avoiding unwanted interruptions.

Loaded with features, miniPAGER can page you reminders. With the press of a button, it can also instantly page a pre-programmed message. Using the optional AlarmAdaptor™, miniPAGER can page you if your home or business alarm goes off.

Easy to use, miniPAGER is ideal for home or small business. It gives you a sense of security knowing that your spouse and children or business associates can quickly reach you at any time.

miniPAGER™ with Call Alert™

- Automatic paging of Caller ID
- Page personal private messages

IDEAL FOR HOME AND SMALL BUSINESS

miniPAGER is a Caller ID display with internal modem and a keyboard. It allows you to forward Caller ID information and to send messages to people with alphanumeric pagers, using the telephone line to connect with paging company.

- Standard paging, (80) character length messages.
- Signature of (2) programmable initials sent at end of message to indicate origin.
- Beep alert indication of transmission success, no dial tone, line busy or message not sent.
- Internal Modem *** pre-set for paging service.
- Automatic paging hand-shake using TAP with 100% confirmation of message transmission.
- Internal state-of-the-art surge protector reduces risk of programming loss or corruption.
- 3 volt lithium battery (included), to retain programming, calls and messages in memory.
- Weak battery alert.
- 110 VAC 9 V 100 mA power adaptor, UL and CSA approved.
- Complies with FCC USA Part 68, Part 15 Class B, Canada IC-DOC-S03, BellCore Caller ID FSD 01-0201070 and Message Waiting Notification FSD 01-02-2000 rules.

Caller ID* Display

Displays Caller ID of incoming calls, storing name and number of caller along with date and time of call.

Alphanumeric Paging

Type personal messages to page family, friends or business associates who carry an alphanumeric pager.

Call Alert™

Automatically pages Caller ID information indicating if call was answered. It also pages Message Waiting Notification* received from phone company if someone leaves a Voice Mail Message in Call Answer Service*. It can also be used with your personal answering machine.

SpeedPage™

Pre-program a personalized message to a selected user for instant paging with the press of a button. Ideal for baby-sitters, elderly care or emergencies.

VoiceCheck™

miniPAGER automatically checks phone line for voice or fax transmission before sending a message, avoiding unwanted interruptions.

Reminder Page

Program date and time to send a message to your pager reminding you of appointments, meetings, medication, pick up children, etc. (For up to three users).

Alarm Notification**

Automatically pages you a pre-programmed message if alarm is activated. Auxiliary port allows you to attach the AlarmAdaptor™ (sold separately), to connect your house or business alarm, panic button or other "dry contact" alarm devices.

*Caller ID and Call Answer Service with Voice Mail Message Waiting Notification are services that may be provided by your local telephone company. **Alarm feature requires the AlarmAdaptor™ sold separately. ***Connects at required 1200 baud, 7E. Optional settings for CCITT and BELL, 300 or 2400 baud, 7E or 8N. Pagers not included.
